

Death in the fields. Poison in our food.

STOP BAYER / MONSANTO!

BAYER's and MONSANTO's business models are ruthless: both companies make their profits through pesticides and genetic engineering; they damage the health of farmers and consumers; they destroy the global climate and biodiversity, and they jeopardise the basis of life and nutrition for all future generations. BAYER now wants to take over MONSANTO, expanding the life-threatening business model to achieve higher profits for major shareholders. Therefore, resistance is essential: for a society of solidarity, free from profit-chasing at the expense of humanity and nature!

We demand:

Stop the BAYER-MONSANTO merger!

Stop environmental destruction through genetic engineering and pesticides!

First name	Last name	Birth year
Postcode and town	Street and house no.	Country (e.g. Germany)
E-mail	Signature
